

# **BSE INSIGHTS WORKSHOP**

## **“EFFECTIVENESS AND DISTRIBUTIONAL IMPACTS OF ENVIRONMENTAL POLICY”**

Policymakers in the realm of environmental policy face major challenges, among them limiting greenhouse gas emissions and mitigating local pollution externalities. While a number of policy instruments are available, mitigation efforts can lead to an unequal distribution of benefits and burdens.

The workshop “Effectiveness and Distributional Impacts of Environmental Policy” will discuss current research on environmental policy, with a focus on improving our understanding of the tradeoffs between their effectiveness and distributional impacts. The event is part of the INSIGHTS workshop series at the Berlin School of Economics (BSE).

Date: **April 6-7, 2022**

Location: DIW Berlin

Format: **Hybrid** (if possible)

Keynote speakers:

- **Janet Currie** (Princeton University)
- **Catherine Hausman** (University of Michigan)
- **Ulrich Wagner** (University of Mannheim)

Please submit a full paper draft (or an extended abstract) to [workshop-wipo@uni-potsdam.de](mailto:workshop-wipo@uni-potsdam.de) by **February 15, 2022**. Decisions will be sent by **February 28, 2022**. There are no workshop fees. Contributions by junior scholars are especially encouraged. We can offer a limited number of lump-sum travel grants for PhD students. Please indicate whether you want to be considered for a grant when you send your submission. In case of questions please contact Aleksandar Zaklan ([azaklan@diw.de](mailto:azaklan@diw.de)). We look forward to receiving your submissions.
